## TERMS AND CONDITIONS OF SALE

---

**ALL PRICES ARE NET, F.O.B. NURSERY AT NORTH-BROOK, ILL., BOXING AND BALING EXTRA; NO CHARGE FOR PACKING BULK CARS.**

**All goods travel at the purchaser's risk and expense.**

**CAUTION—**We accept all orders subject to crop conditions and on condition that same shall be void should injury befall our stock from hail, fire, frost, error in count or other causes beyond our control.

**GUARANTEE OF GENUINENESS—**If any nursery stock proves untrue to description or variety name under which it is sold, we hold ourselves in readiness, on proper proof, to replace such nursery stock that may prove untrue to description or name, or refund the original amount paid. We shall in no case be liable for any sum greater than the amount originally received for said nursery stock.

**CLAIMS** for any cause must be made promptly on receipt of stock. We will not entertain claims after goods have been once accepted, or when report is not made within Ten Days after arrival of stock. We express or imply no warranty as to productiveness or life of the nursery stock we sell and will not be in any way responsible for the results secured in transplanting.

**SPECIAL NOTICE—**Correspondents are requested to use their printed business letterheads. We do not quote prices to retail buyers. We use every effort to limit the distribution of trade prices to those whom we know to be entitled to receive them.

*P. p.*

1. The first group of people who are likely to be affected by the proposed changes are those who are currently employed in the public sector. This group includes all civil servants, police officers, and members of the armed forces. They are likely to be affected because the proposed changes will affect the way in which they are paid and the way in which they are managed.

4. *Chlorophyll content* was determined by the method of Arar and Cook (1980). The chlorophyll content of the leaves was determined by measuring the absorbance of the leaf extract at 663 nm and 665 nm. The chlorophyll content was expressed as mg g<sup>-1</sup> of fresh weight.

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Lichtenthaler (1987). The total chlorophyll content was determined by the method of Arar and Cook (1980).

Figure 1 consists of two scatter plots. The left plot shows a positive correlation between the number of children and the number of adults, with a regression line indicating a positive slope. The right plot shows a negative correlation between the number of children and the number of adults, with a regression line indicating a negative slope.

Figure 1 is a line graph illustrating the percentage of the total sample for various age groups across different years. The x-axis represents years from 1970 to 1990, and the y-axis represents the percentage of the total sample, ranging from 0 to 100. The age groups are: 0-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, and 75+. The graph shows a general trend of decreasing percentages for younger age groups and increasing percentages for older age groups over time.

| Year | 0-14 | 15-24 | 25-34 | 35-44 | 45-54 | 55-64 | 65-74 | 75+ |
|------|------|-------|-------|-------|-------|-------|-------|-----|
| 1970 | 15   | 12    | 10    | 8     | 6     | 4     | 2     | 1   |
| 1975 | 14   | 11    | 9     | 7     | 5     | 3     | 2     | 1   |
| 1980 | 13   | 10    | 8     | 6     | 4     | 3     | 2     | 1   |
| 1985 | 12   | 9     | 7     | 5     | 3     | 2     | 1     | 1   |
| 1990 | 11   | 8     | 6     | 4     | 2     | 1     | 1     | 1   |

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. The first group of people who are likely to be affected by the new law are those who are currently in the process of being deported. This group includes individuals who have been found guilty of a crime and are facing deportation, as well as those who are in the process of being deported but have not yet been removed from the country.

Figure 1. A schematic diagram of the experimental setup. The subject is seated in a chair, viewing a video screen. The screen displays a target (a red dot) and a starting point (a green dot). The subject's hand is positioned at the starting point. The distance between the starting point and the target is 10 cm. The subject is instructed to move the hand from the starting point to the target. The video screen is 100 cm high and 100 cm wide. The starting point is 50 cm from the bottom edge of the screen. The target is 50 cm from the top edge of the screen. The subject's hand is 50 cm from the bottom edge of the screen. The distance between the starting point and the target is 10 cm. The subject is instructed to move the hand from the starting point to the target.
